

INVESTOR PITCH · JULY 2026

Sổ Sạch

The AI bookkeeper on Zalo for Vietnam's 5.2 million household businesses.

LIVE at so-sach.onrender.com · Raising \$300k

Yuri Frassi · frassiyuri@gmail.com · licensed Vietnamese company (SaaS)

01 · THE FORCED-DEMAND EVENT

On 01/01/2026, 5.2 million businesses lost their tax shortcut.

5.2M

households must keep books

73%

report tech difficulties (VCCI)

30/04/26

first filing already due

01/07/26

seller-verification wave

- Lump-sum (khoán) tax is abolished: every hộ kinh doanh must record income & expenses and self-declare quarterly — most for the first time in their lives.
- The incumbents (MISA, KiotViet, Sapo) speak accountant. The street vendor speaks Zalo — 78M monthly users, where Vietnamese commerce already happens.
- Compliance shocks of this scale create category winners — the window is open now, between the first filing and full enforcement.

Snap the receipt. The books do themselves.

1 Photo → Zalo

Receipt, bill or bank-transfer screenshot — sent like a message to a friend.

2 AI writes the ledger

Claude vision reads it, classifies thu/chi, files the entry. One tap to fix.

3 Declaration pre-filled

Thresholds watched all year; form 01/CNKD ready every quarter — print, file, or send to your tax agent.

Already shipped (verified live):

- AI receipt extraction + confirm flow
- Threshold engine 500M / 1B + plain-language alerts
- Pre-filled 01/CNKD + print + Excel export
- Accounts & roles (household / tax agent)
- Tax-agent dashboard w/ client roster — the reseller channel in software
- VietQR billing rails (payOS) + 30-day pilot plans
- Zalo OA bot + PWA; Postgres-ready

→ so-sach.onrender.com — try it in the meeting

A country-sized segment the incumbents can't reach down to.

	Size	Note
TAM	5.2M	household businesses forced into bookkeeping from 2026
SAM	~1.8M	smartphone-active hộ with 200M–3B VND revenue (real bookkeeping duty)
SOM (Y3)	40k subscribers	~2.2% of SAM via HCMC → southern provinces

- Segment A — online sellers (Shopee/TikTok, tax withheld at source): need reconciliation and refund paperwork.
- Segment B — street retail (eateries, kiosks, market stalls): need the ledger, the thresholds and a human-language warning before tax bites.
- One engine serves both; the QR flyer on a market street and the đại lý thuế reach them where software marketing can't.

Priced for a street vendor. Sold by the person they already trust.

Stream	Price	Y3 share	What it buys
Core	69k VND/mo (~\$2.7)	62%	photo ledger, thresholds, declaration draft
Pro	149k VND/mo (~\$5.9)	23%	multi-location, exports, e-invoice via partner API
Tax-agent channel	30% rev-share	15%	agent dashboard for 20–200 clients — trust channel becomes distribution

\$0.2–0.4

COGS / user / month

>85%

gross margin at scale

<\$4

CAC via agents + flyers

VND

billed by our VN entity

Quarterly filing deadlines re-activate lapsed users four times a year — churn has a built-in counterweight.

MISA gives software away free. We still win the vendor.

	Vendor language	Zalo-native	Explains & files	Agent channel
MISA / KiotViet / Sapo	No	Partial	No	No
Tax agents (manual)	Yes	Partial	Yes	—
Sổ Sạch	Yes	Yes	Yes	Built-in, 30%

- The moat is the agent network, not the code. Every đại lý thuế running 50 clients on our dashboard has switching costs; software is copyable, a paid reseller channel is not.
- Compliance, never 'tax optimization'. We compute what the law prescribes and disclaim advice — the only defensible posture in a regulated space.
- Viral by artefact: every declaration and receipt shared on Zalo carries the Sổ Sạch mark — the customer's paperwork recruits the next customer.

Live product now. Channel-built growth next.

When	Milestone	Proof
Today	Product live: ledger, declarations, agent dashboard, billing rails	so-sach.onrender.com
Q3 2026	100-household PAID pilot in 2 HCMC districts via 3–5 tax agents; Zalo OA keys live	week-4 retention ≥25%
Q4 2026	Zalo Mini App (zero-install) + Q4 filing campaign	500 paying
Mid-2027	2,000 subscribers · 25 active agents · e-invoice partner API	\$70k ARR run-rate
2029	40k subscribers via southern provinces + agent network	\$1.6M ARR · EBITDA +\$520k

Founder execution proof: eight live products shipped solo with AI leverage in 2026. This team ships in days, not quarters.

Channel-built, not hoped.

	Y1 (2027)	Y2 (2028)	Y3 (2029)
Paying subscribers	2,000	12,000	40,000
ARR	\$70k	\$450k	\$1.6M
EBITDA	-\$90k	+\$60k	+\$520k
Gross margin	85%	87%	88%

- Assumptions on the table: blended ARPU ~\$3.3/mo · CAC <\$4 · churn 3.5%→2%/mo. We deliberately reject the hockey-stick pitch of this market (200k MAU in 18 months at \$7 ARPU against a free incumbent).
- Kill criteria, committed: pilot week-4 retention <25% or agents unwilling at 30% rev-share → the wedge is wrong, we pivot to agent-only tooling.

\$300k · 18 months

SAFE or priced seed — terms open. Milestones above are the covenant.

Use of funds

- 40% product & AI ops — Zalo Mini App, agent tooling, e-invoice API
- 33% agent network & field GTM (HCMC → south)
- 13% compliance & legal (licensed tax counsel)
- 13% buffer

Exit paths

- Consolidation: MISA / KiotViet / Sapo — 4–6× ARR comparables → \$6–10M at Y3 scale
- Fintech: the verified merchant ledger is the underwriting layer MoMo/VNPay/banks lack for merchant credit
- VNG/Zalo: we build commerce data on their rail — a natural tuck-in
